MEMORANDUM FOR: Chief, Support Staff, NPIC
ATTENTION : Chief, Logistics Branch
SUBJECT : Expenditure of Funds for Chip Comparators

25X1A 1. It is requested that funding for two Chip Comparators in the amount of [] be approved.

25X1A 2. Recently the Photographic Analysis Group sent two Chip Comparators to [] to have modifications made that would allow proper usage of these instruments. As a result of this effort by [] it became apparent that a number of product improvement changes had to be made in addition to interferometer modifications. The modifications to the interferometer are being done at no expense to the government. The other required changes, for which the government is obligated to pay, are placed in the categories of both overrun and increase-in-scope funding.

25X1A 3. These instruments will allow PAG to have an on-line mensuration capability in direct support of the OAK operation. Since intelligence information production is required on real-time basis, mensuration requirements may be accomplished in PAG with these instruments. The above changes are all considered necessary to insure accurate and reliable operation of the Chip Comparators.
